CAPWIC 2024
April 5-6

CAPWIC is a Celebration of Women in Computing that provides a low-cost, regionally tailored, small conference for women in computing. The participants will be female students, faculty, and professionals, as well as allied supporters of women in computing.

The event provides a venue for future computing professionals to gain confidence in their skills, network with each other, and learn from accomplished technical women. The event includes distinguished speakers, panels on academia and industry, student and faculty presentations, a student research poster contest, and a career fair for students in computing fields.

For more information on sponsorship opportunities, visit our website capwic.org

Why sponsor?

CAPWIC 2024 is a great opportunity for your company, organization, or academic unit to show your support for diversity in technology fields, your commitment to the success of technical women, and to recruit the bright minds of tomorrow!

CALL FOR SUBMISSIONS

CAPWIC 2024, the ACM Capital Region Celebration of Women in Computing will be held at the University of Virginia in Charlottesville, VA on April 5-6. The goal of CAPWIC is to bring together female students and allies to promote the recruitment, retention, and progression of women in computing fields. We invite submissions in the area of computing research as well as on efforts to increase diversity in computing in the following formats:

- **Flash Talks**: Five-minute presentations with five minutes for questions. Fast-paced talks on preliminary results, work-in progress, or anything fun and creative related to the conference are welcome in this category. All levels of experience are welcome.

- **Student Posters**: Before the conference, presenters create a 24" x 32" poster of research, a class project, or other type of work-in-progress including efforts to diversify computing and are present at the poster during the session to discuss content. Open to all students. Prizes will be awarded.

- **Student Research Shorts**: Research shorts are an opportunity to give a 15-minute presentation with an additional 5 minutes for questions, similar to a talk at a research conference. Work should be technical in nature, investigating new ideas in any area of computer science. The intention is to give presenters a friendly environment in which to practice a future technical talk or work out details in an ongoing project to get constructive feedback. Only an abstract is required, so future publication of the work is not limited.

- **Technical Workshops**: Workshops present a valuable and current technical skill in a hands-on training session. Proposals must include abstract, the intended audience and power/AV equipment/space needs.

- **Panels**: Panels present multiple perspectives on a topic. Proposals should include abstract, a list of presenters including their affiliation and perspective, along with a proposed length of 25 or 50 minutes.

- **Birds-of-a-Feather**: Birds-of-a-feather (BOF) sessions are opportunities for a group of participants with similar concerns to have an informal discussion. BOF sessions will be 30 minutes.

- **Technical Talks**: 25 minute technical talk with 5 minutes for questions on a relevant and current technical topic. Priority given to younger faculty and industry partners.

Submission instructions: For each category, submit an abstract of no more than 250 words using the submission link by FEBRUARY 9, 2024. All submissions will require the name(s) and affiliation(s) of the presenters, and for students, their year in school. More details are available on the submission site. If you have questions, please contact Jason Forsyth, Program Chair, at *techchair2022@capwic.org*

Important Dates:

Abstract Submission Due: Feb 9, 2024
Acceptance Notification: Feb 19, 2024
Registration Deadline: Mar 5, 2024

See submission link at **capwic.org**
CAPWIC 2024

Calling All High School Students!!

What is CAPWIC??

CAPWIC is a conference that celebrates and highlights women in computing. There are many opportunities for high school students to participate in CAPWIC through flash talks, poster sessions, and volunteering. No experience is necessary! CAPWIC also provides a venue for students interested in computing to gain confidence in their skills, meet other computing students and professionals, and learn from accomplished technical women. The conference will be held at the University of Virginia in Charlottesville, VA
